

TECHNICAL DATA SHEET

ROX[®] 230 AG *Automotive Engine Flush*

Code 0965

DESCRIPTION

The general use and operation of today's petrol and diesel driven engines produce by-products such as varnish, acids, resins and water. Today's engines are also designed to help protect our environment by containing pollutants that previously were released to the atmosphere, these pollutants are recirculated within the engine. Today, lubricating oils need to work harder to maintain the cleaning and suspension of all these additional contaminants. When these by-products become too concentrated to be held in suspension, deposits form on the engine's surfaces.

When heat generated from the engine's normal operation combines with the deposits a sludge is formed, this sludge build-up can cause significant damage to the engine's internal surfaces. Engine flush removes contaminant deposits from the internal surfaces, which cause damage to camshafts, pistons, bearings and crankshafts. It provides a clean environment to protect new oil from immediate contamination. This prolongs the life of the detergent, anti-oxidant and dispersant additives in the new oil. The use of engine flush at every oil change will extend engine life and enhance performance.

* Removes engine sludge	* Cleans the engine internally
* Reduces fresh oil contaminants	* Frees piston rings restores engine compression
* Frees sticky valves and hydraulic lifters	* Extends life of new oil
* Will not harm oil seals or gaskets	* Improves engine efficiency

PHYSICAL PROPERTIES

Appearance : Brown liquid with petroleum odour, does not mix with water.
 Transparency : Clear
 Density at 20°C : 0.81 ± 0.01

DIRECTIONS FOR USE - With engine off, add contents (350ml) to crankcase. Idle engine for 5 to 15 minutes, turn engine off and drain crankcase while oil is still hot. Replace oil plug, install new filter and add new oil.

FIRST AID - In case of eye contact flush thoroughly with water for at least 15 minutes. If swallowed do NOT induce vomiting. Give a glass of water to drink. If on skin, wash with soap and water. Contact a Doctor or Poisons Information Centre Australia 131 126, New Zealand 0800 764 766

PRECAUTIONS & SAFETY INSTRUCTIONS - **Caution: Combustible - do not use near heat or open flame.** Keep out of reach of children.

PACKAGING - 350ml Bottle, Bulk

WARRANTY – All statements, information and data presented herein are believed to be accurate and reliable but are not to be taken as a guarantee, expressed or implied, for which seller assumes legal responsibility and they are offered solely for your consideration, investigation and verification. Statements or suggestions concerning possible use of this product are made without representation or warranty that any such use is free of patent infringement and are not recommendations to infringe on any patent.
