

TECHNICAL DATA SHEET**MILDEW FREE****Code 4400*****Fungicide For The Control of Mould, Moss,
Lichens & Algae Growth*****DESCRIPTION**

Mildew Free is a water soluble fungicide designed to kill fungi and bacteria and to help prevent regrowth.

Mildew Free is supplied as a concentrate and can be used neat, but it is recommended it be diluted 1:3 with water.

CHARACTERISTICS

Mildew Free quickly and efficiently kills fungi, and effectively removes lichen growth on roof tiles, especially terra cotta.

Mildew Free has a relative low toxicity when compared with alternative fungicides.

Mildew Free contains no free acids and is a mild detergent. Mildew Free is therefore relatively non-corrosive to roof gutters and down-pipes.

WARNING

Not to be used on roof areas which are used for the collection of drinking water. Do not allow to come into contact with water in fish ponds.

DIRECTIONS FOR USE

For heavy growth of lichens, moss and mould, dilute 1:3 with water.

For light growth of lichens, moss, and mould, dilute 1:5 with water.

FOR APPLICATION ON ROOFS, WALLS OR OVERHEAD SURFACES:

Apply by soft bristle brush, swab or spray. Allow to soak into the surface and where possible allow at least 3 days without rain for treatment to take effect. Dead growth can then be removed with a stiff bristle brush or by scraping or with high pressure water. Alternatively, the dead growth can be left to gradually wash away by weathering.

FOR APPLICATION ON PAVED AREAS, CONCRETE AND DRIVEWAYS:

Apply with a watering can or spray. Either leave for 3 days without rain before removing or leave to wash away by weathering, or scrub solution into the substrate with stiff bristle brush then allow material to stand without drying for 30-60 minutes. Use a jet of water or high pressure spray to wash clean.

FOR RESIDUAL ACTION:

Apply a solution diluted 1:3 with water and allow to dry on surface.

TECHNICAL DATA SHEET

Mildew Free (4400) - page 2 of 2

FOR PRE-PAINT TREATMENT:

Remove mould and mildew from surface using a hot solution of Mildew Free diluted 1:3 with water. Scrub and wipe clean. Allow surface to dry then using a brush or roller, apply a coat of Mildew Free diluted 1:3 with water to the entire surface. Allow to dry before applying paint. Wear gloves.

Note: Mildew Free does not smell or act as a bleach and is non-corrosive.

SAFETY PRECAUTIONS

For brief contact, no precautions other than clean clothing should be needed. Use impervious gloves when prolonged or frequently repeated contact could occur. It is recommended that rubber gloves, boots and eye protection be used.

FIRST AID

If accidentally splashed in eyes, flush eyes with water for 15 minutes. If skin contact occurs, remove contaminated clothing and wash skin with soap and water. Contaminated clothing should be washed before reuse.
